## The Best Boy

SHARE

★ Superior ★ Cable Match Table

If you have just purchased a CD player, DVD, Blu Ray, radio, TV, amp etc and it comes bundled with a pair of cheap looking interconnects well let Ecosse let you into a secret...

The supplied 'interconnects' are worse than garbage-they're probably adding horrendously to 'noise' in your music/movie system. Get rid of them, bin them, they're worth less than 50cents, and replace them with a genuine upgrade. The Ecosse

'Best Boy' is our entry-level interconnect cable, designed to offer a significant upgrade in systems where supplied cables are inferior, mass-produced sub-standard.

### Powerful Bass Delivery

It's already a 5-STAR AWARD WINNER: "...it delivers a good powerful bass-provided your source can provide it." **WHAT HI-FI? SOUND & VISION**

The signal conductor of this coaxial cable is a rope-lay weave of Ultra-Hi Purity-OFC™ copper with a dielectric insulator of low-loss Foamed Polyethylene, renowned for its lack of sonic signature. The double screen and return conductor is 100% coverage Aluminium/Mylar foil plus a close-lapped Ultra-Hi Purity-OFC™ copper braid. A low microphony, soft PVC jacket protects the cable from the environment.

### Superior RCA Plugs

The 'Best Boy's' high quality direct gold-plated brass 'SUPERIOR' RCA plugs are the same as the plugs used in Ecosse's multi award-winning Composer Interconnect and offer far superior screening and signal transmission to those cheap and nasty RCA's usually fitted to the supplied leads-and unfortunately offered by many of our competitors on their far far more expensive cables.

Ecosse firmly believe that the 'Best Boy' offers unsurpassed quality at an unbelievably inexpensive price. The 'Best Boy' is available in 1.0m pairs only, at a quite ridiculously low price.

This cable synergises well with all our CS-range of loudSpeaker cables-check out our [cable synergy table](#).

### Reviews & Testimonials

"...it delivers a good powerful bass-provided your source can provide it. It also has an attractively open and sparkling treble, by the standards of entry-level cables, with good clarity and character."
