Fibre Optic Cables

SHARE ★ Premier ★ Cable Match Table

Another cable, another award winner...this time it's a What Video Widescreen Best Buy Award: "Full-on 5.1 home cinema heaven ...this luminous orange (T2T Superior) cable oozes quality."

Hi-tech digital fibre optic cables were for many years the sole domain of the professional user. In 2002/03 they were introduced into the audio field - and certainly at Ecosse - with minimal loss in quality. Digital

audio fibre optic offers high speed, wide frequency bandwidth (10MHz) and extremely low-loss. They offer 100% rejection of EMI.

Here the Polymethyl Methacrylate Acrylic Material is clad in a reflective layer-to prevent phase error and noise - and secondary clad in a protective PVC jacket. The whole composition is bound in a 3rd PVC flexible sheath for total environmental isolation ensuring reduction of jitter for enhanced clarity and definition.

Ecosse fibre optic cables delivers accurate Bitstream transfer for the low cost/high performance sonics from Sky and other satellite receivers, CD players, Minidisk, DVD players, DACs etc ensuring distortion-free recordings of digital sources.

Our Patented Technology

Ecosse fibre optic cables often employ a unique and patented spring loaded jack mechanism, which:

- a) solves the mis-tolerance of jacks used by many of our mass-produced competitors, and;
- b) provides a light, and gas-type connection.

It is a prerequisite that these cables are not allowed to fold by more than 30 degrees as this will affect the transmission speed of the cable - fibre optic cables transmit at the speed of light (186 000m/s).

Reviews & Testimonials

"Full-on 5.1 home cinema heaven ...this luminous orange cable oozes quality, sporting a unique patented spring-loaded jack mechanism...it offers high-quality transfer performance...equating to accurate, crystal-clear sonics."

What Video & TV Magazine Best Buy Award, UK

"Ecosse's optical cable is an excellent product, indicated for all music lovers that want to extract the maximum from their equipments."

VALUE: 5-STAR

"Conclusão, O teste ligando a saída digital toslink do DVD com o(s) receiver(s) e reproduzindo um DVD

With moulded strain relief protective clear plastic lens cover, PVC jacket and exclusive robust design, all our fibre optic cables offer outstanding transfer performance and superior presence. These fibre optic cables offer confirmed transmission loss of under 1 dB @1.0m. Our range includes a Superior T2T and a Deluxe Toslink-Toslink model (for the fastest, most accurate sonic transfer). Alternatively, we offer a 3.5 mini optical jack (MiniDisc et al).

Technical Specifications

- Optical grade Polymethyl Methacrylate Acrylic Fibre
- Wide frequency bandwidth (10MHz) with extremely low-loss (<0.1 dB @ 1.0m)
- Speed of light digital transmission
- 100% rejection of EMI
- Polyethylene and ultra low loss LDFPE dielectrics
- Unique and patented anti-shock spring loaded 'jack' mechanism connector keeps fibre in optical alignment for maximum data transfer
