## The Producer

We introduced this cable to the world market in the year 2000-it won Best Digital Interconnect from the illustrious What Hi-Fi? Sound & Vision Magazine. Over ten years later, and numerous Best Buy Digital Interconnect Awards and 5-Star reviews continue to rain down on this magnificent digital interconnect.

Here's why: **It's the cheapest interconnect on the planet to use ultra-pure, grain-free (single) high-end Monocrystal™ conductor material.**

As the reviewer at What Hi-Fi? so accurately put it: "...a digital cable that

puts in such a superb performance that you might well wonder if the Scottish company has the decimal point in the wrong place."

The Producer Digital's ability to transmit digital information - the pulsed square wave high frequency signal - is without equal at anything close to this price - thanks largely to the use of unique trademarked ultra-pure Monocrystal™ copper in the important 'going' conductor-a conductor material so expensive and pure it has, quite frankly, never before been considered in a cable at anything approaching this price point.

### Performance improvements over all entry level interconnects

It offers significant improvements over all ALL entry level digital interconnects-thanks mainly to the superior conductive qualities of the Monocrystal™ Copper multistranded rope-lay woven signal conductor- but also because of its superb construction which includes ultra low-loss air-foamed Polyethylene dielectric insulator all encased in a dual screen of Al/Mylar continuous foil and Ultra-Hi Purity-OFC braid (designed to reject extraneous 'noise' which may otherwise affect the delicate signal).

It is vital that quality digital cable closely matches the 'characteristic impedance' (75ohm) of the digital signal- this being the most important concern of digital signal transmission. Of near-equal importance is 'capacitance' -which must be kept as low as possible. The topology of "The Producer" digital interconnect is carefully controlled to match these required specifications.

'The Producer' is a genuine 75ohm device and is double screened to reject unwanted 'noise' with ease. The Producer may be terminated in RCA or BNC plugs or a combination of the two.

"We recommend the "Producer" for the digital connection from the DVD to AV amplifiers, where it really makes miracles considering its cost... beautiful appearance and such a quality of construction that honors its category of price... It seems that the Monocrystal construction gives a clear advance in the sound of the cables..."

BHi-End Opontiaem, Greek Magazine

"Considering the price, (it) delivers wonderfully vivid dynamics. Music sounds neutral with vocals and instruments being reproduced I a wholly believable manner. Cymbals
